PROFESSIONAL SUMMARY

Full-Stack Developer & Systems Integration Engineer with hands-on experience spanning legacy system modernization, POS/ERP integration, and full-stack web development. Proven track record bridging decades-old infrastructure with modern platforms — including migrating a legacy C# ERP off deprecated/compromised dependencies and integrating a hospital's legacy FoxPro database with a modern WhatsApp messaging pipeline. Builds and ships production Laravel/PHP applications independently end-to-end, backed by Linux server administration and automation tooling that has cut manual maintenance and support overhead by up to 70%. Comfortable working async and remote with international teams; Professional Working Proficiency in English.

TECHNICAL SKILLS

Languages: PHP, C#, JavaScript, HTML, CSS, PowerShell, SQL

Frameworks & Platforms: Laravel, Laravel Filament, Livewire, .NET Framework, Flutter, Unity (URP)

Databases: MySQL, Microsoft SQL Server, FoxPro (legacy integration)

Infrastructure & DevOps: Ubuntu Server Administration, SSH & Firewall Configuration, Hosting/Server Management, Remote Deployment Automation

Integrations & APIs: REST API Integration, WhatsApp Business API (BestSMSBulk), Hardware/POS Device Integration (JHScale TM-xA), IP-Printing Systems

Tools & Version Control: Git, GitHub, AnyDesk, Ticketing/Support Systems

Domain Expertise: POS/ERP Systems, Legacy System Modernization, Supply-Chain Dependency Security, Multi-Vendor Marketplace Platforms

WORK EXPERIENCE

IT Specialist (Systems & Development) *Dec 2024 – Aug 2026*

Computronics SARL, Zahle, Lebanon

- Engineered and maintained POS/ERP integrations (AlphaSoft) across 100+ active client terminals, including direct hardware API connections for digital scales and customer-facing display modules.
- Led a full dependency modernization of a legacy C# WinForms ERP system to .NET Framework 4.8.1, resolving breaking changes across deprecated and renamed packages — **including identifying and remediating a supply-chain security compromise from a spoofed NuGet package**, preventing a potential production security incident.
- Redesigned a PowerShell-based deployment process into a standalone automated installer, **cutting remote support time by ~50%** across SQL Server connectivity setup, license provisioning, and client configuration.
- Architected a legacy-to-modern data bridge connecting a hospital client's FoxPro system with SQL Server to drive automated WhatsApp patient communications via a third-party messaging API — enabling real-time patient outreach on infrastructure that predates modern APIs by decades.
- Administered company server infrastructure on Ubuntu Server, configuring SSH access and firewall policy to maintain **24/7 uptime** across staff and client-facing systems.
- Built and deployed custom automation (one-click update/backup protocols) directly into the POS platform, **reducing manual maintenance time by 70% and eliminating recurring data-loss incidents**.
- Designed and operated an internal support/ticketing system, **cutting average response time from 3–4 hours to 30 minutes** while resolving ~40 tickets/month.

IT Support Intern *Nov 2024 – Dec 2024*

Computronics SARL, Zahle, Lebanon

- Supported AlphaSoft accounting system implementation through data migration, system setup, and client training.
- Provided remote technical support via AnyDesk, building strong client-facing communication and troubleshooting skills.

SELECTED PROJECTS

Wassili — PHP / Laravel

- Built a multi-vendor delivery and marketplace platform for the Lebanese market end-to-end, handling concurrent multi-vendor order flows and integrated WhatsApp-based customer communication.

Sortifya — Laravel 12 / Filament v3

- Developed a bilingual (EN/AR, full RTL support) micro-task platform with a claim-based task workflow, admin panel, and automated payout tracking for a distributed user base.

Amanelle Beauty — Laravel 13 / Filament 5 / Livewire 4 / Tailwind v4

- Delivered a full bilingual e-commerce storefront and Filament-based admin back office covering catalog, order, and inventory management.

Nabil Mediterranean Food — PHP / MySQL

- Built an online ordering system integrated with an AI-powered Telegram bot for automated admin operations, reducing manual order handling.

Tableside Ordering System (Mobile POS) — Web app + IP printing

- Engineered a tablet-optimized real-time ordering interface for waitstaff with direct IP-printing integration, routing tickets straight to kitchen stations with no manual relay step.

Kalemni — Flutter / Firebase

- Cross-platform chat app with real-time state management across 5 screens and a 3-collection Firestore architecture supporting OTP phone auth, profiles, and live messaging.

CyberpunkExpress — Unity 6 / URP

- 3D arcade-style delivery game built with Unity's Universal Render Pipeline.

Dietitian Practice Platform — Laravel

- Full-stack professional website with content management, deployed for a dietitian's practice.

EDUCATION

Bachelor's Degree in Computer Science Oct 2021 – Aug 2024

Lebanese International University

CERTIFICATIONS & TRAINING

- Kanz AI Training Hackathon — LAU Academy of Continuing Education & Kanz (July 2026)

LANGUAGES

- Arabic — Native
- English — Professional Working Proficiency
