PROFESSIONAL SUMMARY

Systems & Infrastructure Developer with hands-on experience bridging hardware deployments and custom software integration. Proven track record in managing Linux-based server infrastructure (Ubuntu), developing automated POS solutions, and building full-stack web applications (Laravel, PHP, SQL). Built automation scripts that cut manual maintenance work and reduced downtime for client-facing POS systems.

WORK EXPERIENCE

IT Specialist (Systems & Development) | Computronics SARL, Zahle, Lebanon (December 2024 - Present)

- Engineered comprehensive AlphaSoft POS integrations across 100's of active terminals, including direct API connections for JHScale (TM-xA) digital scales and secondary customer-facing display modules.
- Architected and maintained the company's internal server infrastructure using Ubuntu Server, configuring SSH access and system firewalls to sustain 24/7 uptime while securing systems for all staff and client accounts.
- Developed and embedded custom automation scripts directly into the POS system (One-click Update & Backup protocols), cutting manual maintenance time by 70% and eliminating recurring data-loss incidents.
- Developed and managed a dedicated support/ticketing system, cutting average response time from 3-4 to 0.5 hours while resolving 40 tickets per month.
- Wrote a PowerShell script to automate direct edits to client configuration files during software installs and updates, cutting remote AnyDesk support time by roughly 50% compared to manual configuration.

IT Support Intern | Computronics SARL, Zahle, Lebanon November 2024 – December 2024

- Supported AlphaSoft accounting system implementation through data migration, system setup, and client training.
- Provided remote technical support using AnyDesk, honing communication and problem-solving skills.

EDUCATION

Bachelor's degree in Computer Science | Lebanese International University (2021-2024)

PROJECTS

- **Tableside Ordering System (Mobile POS):** Developed a responsive, tablet-optimized web application for waitstaff to manage real-time table orders, featuring direct IP-printing integration to instantly route tickets to kitchen stations.
- **Dietitian Practice Web Platform:** Designed and deployed a full-stack professional website using Laravel, focusing on performance, responsive UI, and seamless content management.
- **Kalemni Mobile Chat App:** Built a cross-platform mobile messaging application using Flutter and Firebase, featuring real-time state management across 5 UI screens and a NoSQL database architecture with 3 Firestore collections supporting secure OTP phone authentication, dynamic profile creation, and real-time text messaging.
- **Shoe Store Website:** Interactive front-end design project (HTML, CSS, JavaScript).
- **Event Management System:** Desktop application for scheduling and resource allocation (C#).

TECHNICAL SKILLS

- **Infrastructure & Networking:** Ubuntu Server, Hardware/POS Diagnostics, Hosting Services Management.
- **Development Frameworks & Languages:** Laravel, PHP, C#, JavaScript, HTML, CSS, PowerShell.
- **Databases & Version Control:** MySQL, Git, GitHub.
- **System Integrations:** JHScale (TM-xA) Integration, Automated Backup/Update Scripting.

LANGUAGES

- **Arabic:** Native
- **English:** Professional Working Proficiency
